Product Naming System

QuickSet **Taper** **305** / **00**
Cladding Type   **Height (mm)**   **Base Insulation Thickness (mm)**

In the naming system, the cladding type refers to the type of QuickSet system:

- **Taper** is for standard cladding;
- **Ultra** is for standard cladding but features an insulated top cap for 140mm framing and above;
- **Rebate** is for brick cladding.

The height value refers to the height of the formwork.

The final values after the slash denote the base insulation thickness, where 00 denotes no base insulation.

305 mm

QuickSet **Rebate** **120** / **305** / **50**

Cladding Type   **Rebate Size (mm)**   **Height (mm)**   **Base Insulation Thickness (mm)**

120 mm

305 mm

50 mm

QuickSet **Ultra** **305** / **25**

Cladding Type   **Height (mm)**   **Base Insulation Thickness (mm)**

This is where the top cap for the QuickSet Ultra system is placed.

305 mm

25 mm
